High Tensile Wire Technology That Offers The Ultimate Protection Against Animal Intrusion

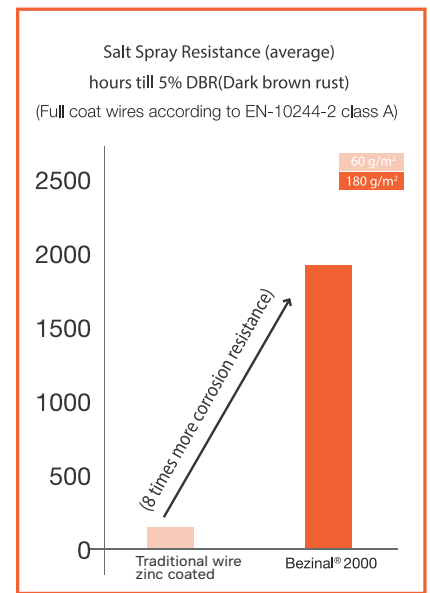

Bekaert's high tensile wire used in Duron®'s fixed knot fences not only ensures lower sag but also helps reducing the number of posts by upto 50% as compared to conventional fences. This helps to substantially lower the overall investment of your perimeter fence.

Long-Lasting Corrosion Protection

Wires used in Duron®'s fixed knot fences are coated with Bezinal®2000, a zinc-aluminum coating developed and produced exclusively by Bekaert. This coating substantially improves corrosion resistance by 6-8 times in comparison with fences that use heavy galvanised coating.

What Makes Duron Fixed Knot Fences The Best Choice For Farms?

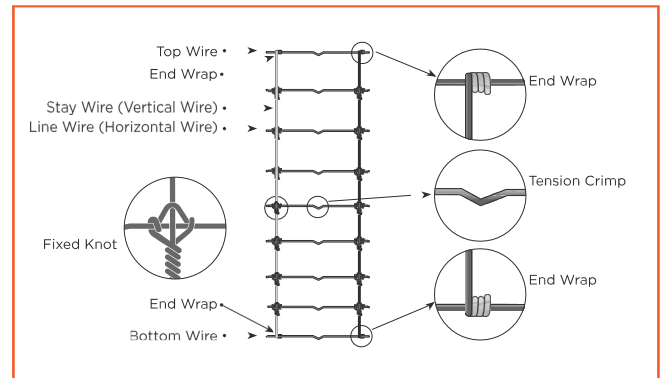

- ✓ Robust design & construction
- ✓ Use of high tensile wires for line & stay wires both
- ✓ Fixed, non-slip knots
- ✓ Consistent crimps on wires along the fence
- ✓ Higher diameter wires at top and middle for added strength
- ✓ Highest impact resistance
- ✓ Designed to withstand small and large animal intrusions
- ✓ Built to last-Bezinal® 2000 coating
- ✓ Easy & quick to install allows higher post to post spacing 5-6 meters
- ✓ More affordable
- ✓ Guaranteed roll length
